PROJECTS

MapEntity — *Jobs on a map*

My first endeavor related to web applications. I shared my vision with a contracted web developer who created this MVP using Wordpress and hosted through GoDaddy. I am currently working on MapEntityJobs.com as an independent web developer with a new foundational knowledge and skill-set in web development to further materialize my vision of a revolutionized way of employer-employee and recruiter-candidate networking.

MoveIt — *Jobs*

<https://nelliafc.github.io/HighLife/>

The purpose behind this project is to combine two major aspects of moving; work and accommodations. Choose A place you want to move to, then find a job and find the rest all from one location. This was a group collaboration to showcase our skill set in API call integration to an HTML website. My role was finding, coding and integrating the APIs. As a step further I entirely coded the Maps page for populating jobs returned from a query to a map and displaying pertinent information in a popup. I chose to take on this role as those skill sets will be valuable to my future productions.

Replay — *Track the search*

<https://replay.herokuapp.com/>

The purpose behind this web app is to provide a tracking system for applicants' resumes as well as potential recruits. As the recruiter you track your applicants. As the applicant you track your search progress and submitted applications. The main processes here deal with MySQL databases, user-authentication and CRUD methods. My role in this project was tying the back-end logic to the front end UI using RESTful APIs integration.

My Portfolio

SKILLS

HTML	CSS
Javascript	node
Express	SQL
React	MERN
RESTful APIs	

LANGUAGES

English - Fluent

Spanish - Fluent

WORK EXPERIENCE

JE Dunn, San Antonio TX —Tower Crane Operator

JUNE 2020 - PRESENT

Full time Operator building sky-rises for the greater Austin and San Antonio areas

PLW Waterworks, Midland TX —Crawler Crane Operator

2018 - 2020

Ran a crawler crane building the water treatment plant of Midland TX

EDUCATION

UT Coding Bootcamp, Austin TX — *Full Stack Web Development*

JUNE 2021 - December 20XX

Inspired by the desire to be in charge of my own creations I enrolled in this curriculum and have found immense success. I have developed an extensive portfolio of web applications as well as gained experience in group collaborations.

South Plains College, Levelland TX — *A.S. Wildlife Management*

JANUARY 2015 - MAY 2018

Attained a degree in natural sciences in line with my affinity for nature and wildlife.
